Careers and calculation of different types of income

	<i>L_{vi}</i>	<i>S_u</i>	<i>K_r</i>	<i>P_u</i>
Executive Director	10	500000	14,00	3000
Coordinator	9	250000	13,90	2500
International Director	8	100000	13,70	2000
Regional Director	7	60000	13,50	1700
Director	6	25000	12,50	1200
Senior Advisor	5	10000	10,50	800
Advisor	4	3000	8,50	500
Senior Consultant	3	700	6,50	300
Consultant	2	0	5,50	100
	1	0	4,50	<100

L_{vi} – Career band

S_u – Structural units

P_u – Personal units

K_r – Royalty coefficient

K_s – Constant coefficient 300

What does the Pu unit stand for?

Amount of contract (EURO)

$$P_U = \frac{\text{Amount of contract (EURO)}}{300 \text{ (constant)}}$$

For example: the client chooses the portfolio

$$P_U = \frac{15\,000 \text{ EURO}}{300 \text{ (constant)}} = 50 \text{ units}$$

$$P_U = \frac{20\,000 \text{ EURO}}{300 \text{ (constant)}} = 75 \text{ units}$$

$$P_U = \frac{30\,000 \text{ EURO}}{300 \text{ (constant)}} = 100 \text{ units}$$

CAREER AND INCOME

Calculation example

Fixed amount for direct contract

Su (Structural units)	Kr (Royalty)	Pu (Personal units)	Lvl (Level)
700	6,50	300	3
0	5,50	100	2
0	4,50	< 100	1

$$\text{Pu (Personal units)} = \text{Sk (Amount of contract)} / \text{Ks (Constant coefficient)}$$

$$10\,000 \text{ €} / 300 = 33,33$$

Pu (Personal units) from Sk (Amount of contract) calculation example

$$\text{Sk } 20\,000 = \text{Pu } 66,66$$

$$\text{Sk } 30\,000 = \text{Pu } 99,99$$

$$\text{Sk } 50\,000 = \text{Pu } 166,66$$

Example of calculating a fixed amount for a direct contract Sk 50 000 €

$$\text{Sk } 50\,000 = \text{Pu } 166,65$$

$$\text{Pu } 100 * 4,5(\text{Lvl } 1) = 450 \text{ €}$$

$$\text{Pu } 66,65 * 5,5(\text{Lvl } 2) = 366,57 \text{ €}$$

$$= 816,57 \text{ €}$$

**Consultant fee for direct contract is paid
immediately in 100%**

CAREER AND INCOME

Additional charge for increasing the amount of the contract

For example, the same client has closed the amount of the contract and after a while he decided to transfer another 10,000 € to the investment account. You also receive income according to the following scheme: $10,000 \text{ €} / 300 * \text{Royalty}$ (for example, by this time you have already reached 5th level, so we multiply by 10.5 = 350 € - this is the amount you get into your operating account).

Lvl (Level)	Kr (Royalty coefficient)
10	14
9	13,9
8	13,7
7	13,5
6	12,5
5	10,5
4	8,5
3	6,5
2	5,5
1	4,5

The calculation of the Royalty amount is made according to the following formula :

$$R = (S / 300) * K_R$$

where:

R – the Royalty calculation amount;

S – personally invited deposit amount;

300 – constant coefficient;

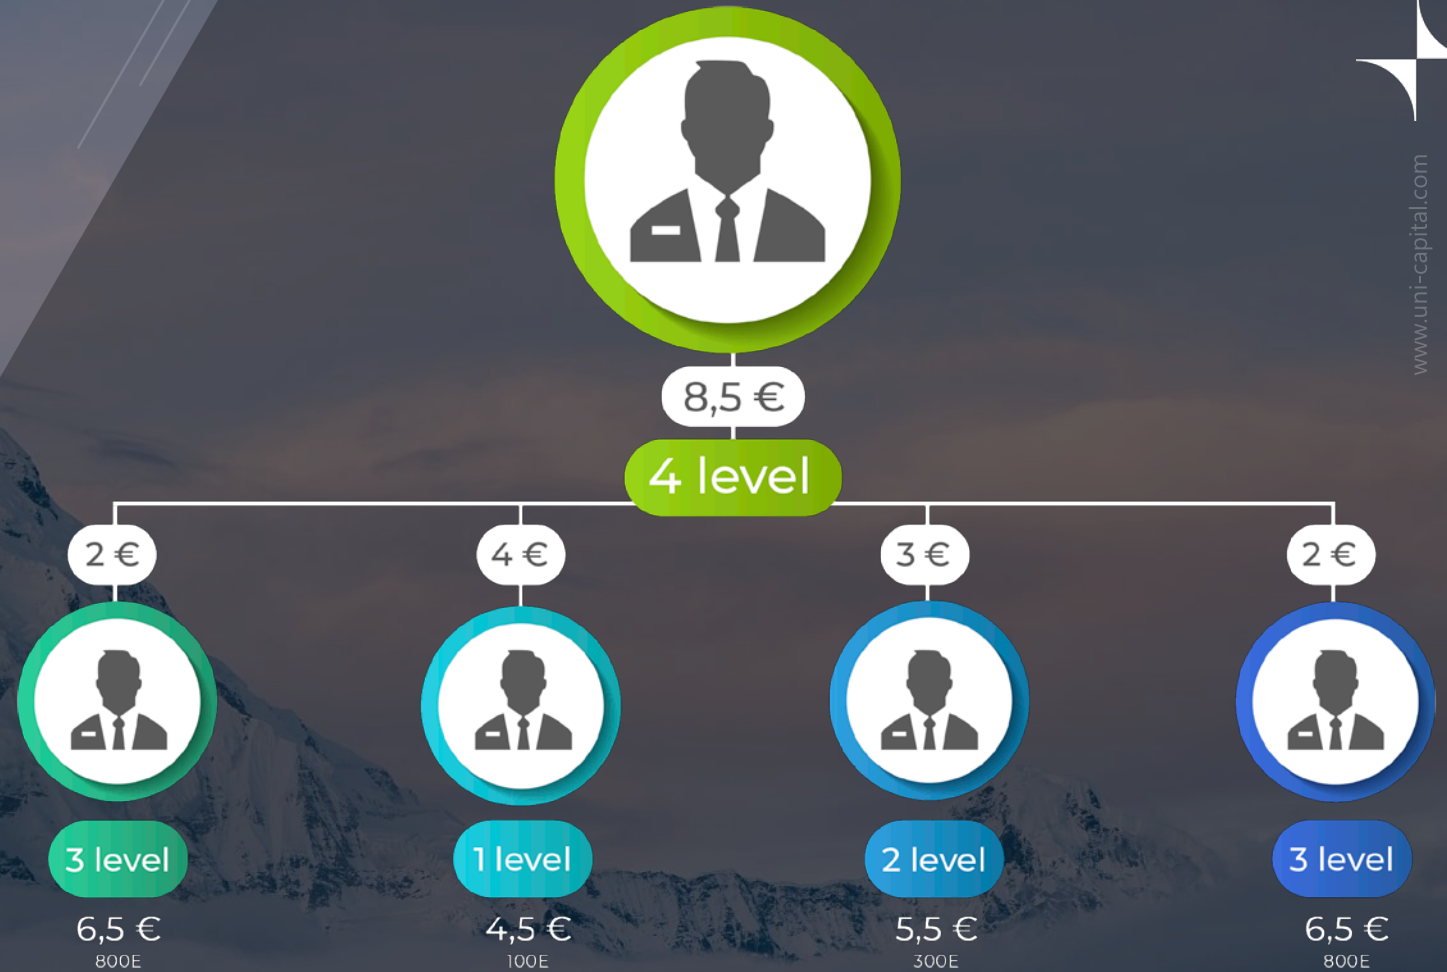

Kr – Royalty coefficient according to the table

According to the statistics, 90% of clients fill their portfolio up
and boost their accounts

CAREER AND INCOME

Structural income from level difference

Calculation example

$$100E * 4 € = 400 €$$

$$1\ 600E * 2 € = 3\ 200 €$$

$$300E * 4 € = 900€$$

TOTAL: 4 500 €

CAREER AND INCOME

Passive income - % of the personal attracted clients turnover

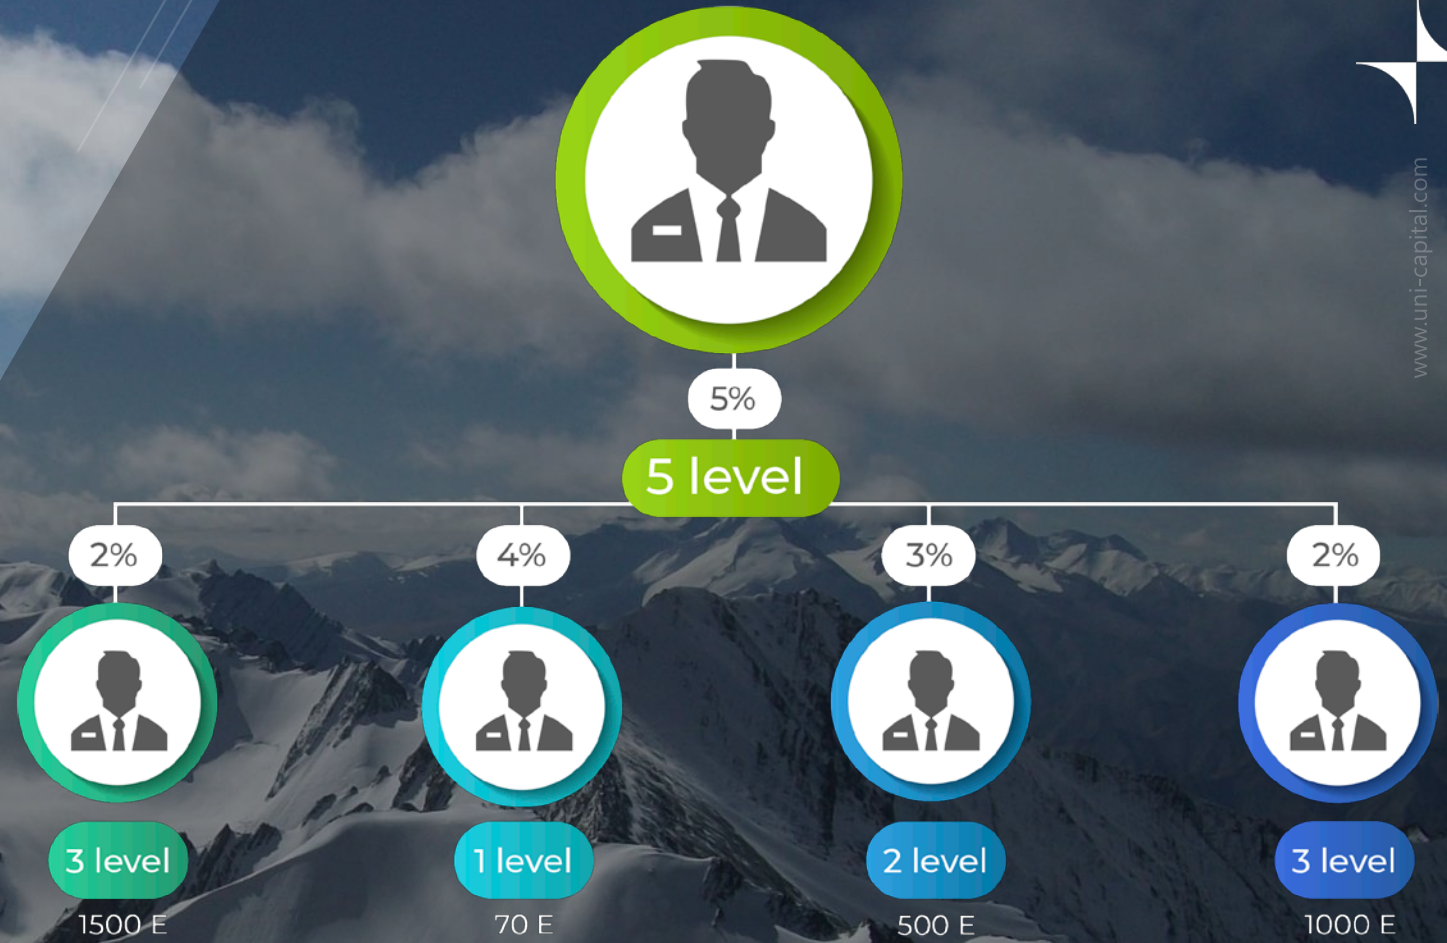

Dividend income of direct capital attracted by you *% from your level (according to the table)

Level	Rate of %
10	10
9	9
8	8
7	7
6	6
5	5
4	4
3	3
2	2
1	1

The Adviser at the 4th level has attracted 150,000 €. Clients/partners under him have received 2% of dividends per month = 3,000 €. The Adviser, being at the 4th level, receives 4% from these 3000 EURO, which is = 120 €.

CAREER AND INCOME

Passive income - % of the structural attracted clients turnover

This is the income from the dividends of the attracted capital of your structure *% from your level difference and % of the partners under you.

Calculation example:

3 Lv. x 2 = 750 000 = (2,5%) 18 750 € * 2% = 375 €
 2 Lv. = 150 000 = (2,5%) 3 750 € * 3% = 112,5 €
 1 Lv. = 21 000 = (2,5%) 520 € * 4% = 20,8 €

TOTAL: 508,3 €
